Skilled in **Figma, Canva, Photoshop, wireframing and visual design**, with knowledge in **Angular, React, React Native, Java, REST APIs and TypeScript**, enabling the creation of user-centered digital experiences. Proactive, organized and collaborative.

EDUCATION

CESAR School

Associate's Degree, Analysis and Development of Systems

Feb, 2025 - Present

Recife, PE

Universidade Federal de Pernambuco

Bachelor's Degree (Licentiate), Visual Arts

May, 2023 - Present

Recife, PE

Instituto Federal de Pernambuco

High School Technical Degree, Occupational Safety

Mar, 2018 - Dec, 2022

Recife, PE

EXPERIENCE

WING Games

Recife, PE

Apr, 2026 - Present

- Participation in a research group dedicated to developing a gamified literacy application for neurodivergent children.
- Development of mobile screens and components with React Native and TypeScript, for Android and iOS platforms, with a focus on accessibility and inclusive experience.
- Elaboration of living component documentation with Storybook, standardizing the project's UI library to ensure visual consistency and facilitate team collaboration.

Technological Residency of Porto Digital

Recife, PE

Feb, 2025 - Present

- Development of software solutions for Porto Digital partner companies, working on back-end with Java Spring Boot and REST APIs, and front-end with Angular and TypeScript for creating dynamic interfaces.

- Full participation in the product cycle within the PBL model, including prototyping in Figma, deployment, and pitching the solutions.

PROJECTS

Integra+

Porto Digital Residency

- Project developed focusing on SDG 3 (Good Health and Well-being) principles, utilizing Canva, Illustrator and Figma for design and prototyping.
- Selected among 56 teams to present at Demoday (Porto Digital) and awarded in the Residency Project category at the Expotech Education Showcase (REC'n'Play), highlighting the project's innovation and potential.
- Invited and approved for the Porto Digital 2026 pre-incubation program, recognized for the project's social impact and business viability.

TransCare

Porto Digital Residency

- Front-end development of a healthcare platform for LGBTQIAP+ individuals using Angular and TypeScript, implementing components, services, and routes, as well as serving as SCRUM Master, managing backlog, sprints, and deliveries using the Agile SCRUM methodology.

Restaurant Management CRUD System (Python)

CESAR School

- Developed a comprehensive system to streamline restaurant operations, implemented in Python and leveraging the Pandas library for data processing.

Lógica à La Carte

CESAR School

- Educational game developed as a command-line interface (CLI) focused on teaching Propositional Logic, combined with practical application of the C language.
- Achieved 2nd place at Tech Night and was named Best PIF Game at the Tech Design Showcase, both events hosted by CESAR School.

Chronicles of Lumi

Personal project

- 2D platformer game developed in Python using Pygame Zero, implementing movement, collision, and basic physics mechanics, with black-and-white pixel art aesthetics.
